- The latest addition to Godbar Software's suite of modules in The Practice Software Management
- For some time now surgeries have been requesting a stockcontrol and imprest system which would
- The Practice Stock Imprest Module enables record keeping of the amount and value of stock purchased
- Stock inventory and stocktake can be undertaken.
- Stock numbers can be allocated or automatically generated.
- If a surgery has already listed a number of stock items prior to using this module, the item can be
- Multiple units of the same item can be invoiced.
- Items sold appear on a GST Stock invoice with the GST component readily identifiable and therefore
- Stock invoices are separate to Service invoices and therefore Medicare problems are avoided.
- Stock Module Reports include -
 - Stock Report
 - Stock Level Indicator Report
 - Stocktake Report
 - Stock Control History Report
